

Build HomeoCare Pro Enterprise

Create a complete enterprise-grade Homeopathic Clinic Management System called **HomeoCare Pro Enterprise**.

The software must be suitable for single clinics, multi-branch clinics, and future expansion into a chain of homeopathic hospitals.

The system must be production-ready, secure, scalable, mobile responsive, cloud-enabled, and capable of handling more than 100,000 patient records.

Primary Goal

Develop a centralized clinic management platform that manages:

- Patients
 - Doctors
 - Reception Staff
 - Appointments
 - Treatments
 - Prescriptions
 - Medical Reports
 - Billing
 - Follow-Ups
 - WhatsApp Notifications
 - Patient Portal
 - Analytics
 - Cloud Backup
-

Technology Stack

Frontend:

- Next.js 15
- React
- TypeScript
- Tailwind CSS
- ShadCN UI

Backend:

- Next.js Server Actions + API Routes

Database:

- PostgreSQL

Authentication:

- Supabase Auth

Storage:

- Supabase Storage

PDF Generation:

- PDFMake

Charts:

- Recharts

Deployment:

- Vercel
- Supabase

ORM:

- Prisma ORM

Validation:

- Zod

State Management:

- Zustand

Multi Language Support

Support:

- English
- Hindi
- Marathi

Users should be able to switch language from settings.

Translate:

- Dashboard
- Forms

- Reports
- Prescriptions
- Patient Portal

Store preferred language per user.

User Roles

Super Admin

Can:

- Manage all branches
 - Manage subscriptions
 - View all analytics
 - Manage doctors
 - Manage users
 - Access audit logs
 - Manage backups
-

Clinic Admin

Can:

- Manage clinic settings
 - Manage staff
 - Manage doctors
 - View reports
 - Manage appointments
-

Doctor

Can:

- Access patient records
 - Create treatment records
 - Upload prescriptions
 - View reports
 - Create follow-ups
-

Receptionist

Can:

- Register patients
 - Manage appointments
 - Upload reports
 - Collect payments
-

Patient

Can:

- Login to portal
 - View appointments
 - Download reports
 - Download prescriptions
 - Receive reminders
-

Dashboard

Widgets:

- Total Patients
- New Patients
- Today's Appointments
- Follow-Ups Due
- Revenue Today
- Revenue This Month
- Active Doctors
- Uploaded Reports

Charts:

- Monthly Patient Growth
 - Disease Distribution
 - Revenue Trends
 - Appointment Statistics
-

Patient Management

Generate unique patient number.

Example:

PAT-2026-00001

Store:

Personal Information:

- First Name
- Last Name
- Gender
- DOB
- Age
- Mobile
- Alternate Mobile
- Email
- Aadhaar (optional)
- Address
- City
- State
- Country

Medical Information:

- Chief Complaint
- Symptoms
- Duration
- Disease
- Allergy History
- Family History
- Previous Treatments
- Lifestyle Habits

Emergency Contact:

- Name
- Relation
- Mobile

Features:

- Add Patient
- Edit Patient
- Archive Patient
- Search Patient
- Merge Duplicate Patients

Digital Patient File

Create complete patient profile.

Tabs:

- Overview
- Appointments
- Treatments
- Prescriptions
- Reports
- Billing
- Follow-Ups
- Timeline

Timeline should display:

Patient Registered

Appointment Created

Treatment Added

Prescription Generated

Report Uploaded

Payment Recorded

Follow-Up Scheduled

Appointment System

Features:

- Create Appointment
- Reschedule
- Cancel
- Complete
- No Show

Views:

- Daily
- Weekly
- Monthly
- Doctor Wise

Appointment Status:

- Scheduled
- Confirmed
- Waiting

- Completed
 - Cancelled
 - No Show
-

Treatment Module

Each consultation must create treatment history.

Fields:

- Consultation Date
- Symptoms
- Observations
- Diagnosis
- Homeopathic Medicine
- Potency
- Dosage
- Duration
- Doctor Notes
- Follow-Up Date

Treatment history should never be deleted.

Maintain audit logs.

Prescription Generator

Professional printable prescription.

Include:

- Clinic Logo
- Clinic Header
- Doctor Information
- Patient Information
- Medicines
- Instructions
- Follow-Up Date
- Signature Area

Functions:

- Print
 - Download PDF
 - Email Prescription
 - WhatsApp Prescription
-

Report Upload Module

Upload:

- PDF
- PNG
- JPG
- JPEG
- DOCX

Categories:

- Blood Test
- X-Ray
- MRI
- CT Scan
- Ultrasound
- Prescription
- Other

Features:

- Preview
- Download
- Version History
- Secure Access

WhatsApp Integration

Implement WhatsApp notifications.

Send:

Appointment Confirmation

Appointment Reminder

Follow-Up Reminder

Prescription Ready

Payment Receipt

Patient Birthday Greetings

Clinic Announcements

Provide message templates.

SMS Integration

Fallback if WhatsApp fails.

Send:

OTP

Appointment Reminder

Follow-Up Reminder

Payment Confirmation

Patient Portal

Patient Login.

Features:

- View Appointments
 - Download Prescriptions
 - Download Reports
 - View Treatment History
 - Update Profile
 - Request Appointment
-

Billing Module

Invoice System.

Fields:

- Consultation Charges
- Medicine Charges
- Additional Charges
- Discounts
- Taxes
- Total

Payment Modes:

- Cash
- UPI
- Credit Card
- Debit Card
- Net Banking

Generate GST invoice.

Revenue Management

Reports:

- Daily Revenue
- Monthly Revenue
- Yearly Revenue

Charts:

- Revenue Trends
 - Outstanding Payments
-

Follow-Up Management

Track:

- Due Today
- Due Tomorrow
- Missed Follow-Ups

Dashboard Alerts:

Red = Overdue

Yellow = Upcoming

Green = Completed

Inventory Management

Track homeopathic medicines.

Fields:

- Medicine Name
- Manufacturer
- Batch Number
- Expiry Date
- Quantity

Features:

- Low Stock Alerts
 - Expiry Alerts
 - Purchase History
-

Cloud Backup

Automatic Backup.

Backup:

- Database
- Uploaded Reports
- Prescriptions

Options:

- Daily
- Weekly
- Monthly

Restore Functionality Required.

Audit Logs

Track every action.

Store:

- User
- Action
- Timestamp
- IP Address

Examples:

Patient Updated

Report Deleted

Invoice Generated

Doctor Added

Analytics Module

Generate:

Patient Growth

Revenue Growth

Disease Trends

Doctor Performance

Appointment Statistics

Follow-Up Success Rate

Export:

PDF

Excel

CSV

Search System

Global Search Bar.

Search By:

- Patient Name
- Mobile Number
- Patient ID
- Disease
- Appointment ID
- Invoice Number

Use full-text search.

Security Requirements

Implement:

- JWT Authentication
- Role-Based Access Control
- Password Hashing
- Audit Logs
- Rate Limiting
- Input Validation
- SQL Injection Protection
- XSS Protection
- CSRF Protection
- Secure File Upload

All medical records must be protected.

Database Tables

users roles permissions clinics branches doctors patients appointments treatments prescriptions reports followups invoices payments inventory stock_transactions notifications activity_logs audit_logs backups

Use PostgreSQL with Prisma ORM.

Implement foreign keys, indexing, pagination, and optimized queries.

UI Requirements

Design should look like modern hospital software.

Pages:

Login

Dashboard

Patients

Appointments

Treatments

Prescriptions

Reports

Billing

Inventory

Analytics

Settings

Patient Portal

Requirements:

Responsive Design

Mobile Friendly

Dark Mode

Light Mode

Accessibility Support

Professional Medical Theme

Deliverables

Generate:

1. Complete PostgreSQL schema
2. Prisma schema
3. Database migrations
4. Authentication system
5. API routes
6. Frontend pages
7. Dashboard
8. File upload module
9. PDF generator
10. WhatsApp integration
11. SMS integration
12. Patient portal
13. Inventory module
14. Analytics dashboard
15. Cloud backup system
16. Deployment guide
17. Docker configuration
18. Production documentation

Build the application as a production-ready enterprise healthcare management platform.
